

What to tell students about Turnitin

If you plan to use Turnitin for your course, please include that information on the Course Syllabus. The following is suggested wording for your Syllabus:

The academic integrity of the students in this course and Policy 3100, the San Diego Community College District Student Code of Conduct, require that all student work including, but not limited to, discussion postings, assignments, essays, papers, and exams be free of plagiarism. Students must fully cite any text, graphics, or others' ideas they include in that work.

As part of our commitment to academic integrity, student work in this course may be submitted to Turnitin, an online plagiarism checking service. For more information about the Turnitin program, see the Turnitin Tips & Tutorials page.
