Miramar College	Thursday	2:00-3:00 p.m.	W-222	Flex # 59196

To earn the Flex credit for this training course, a total of about 10-12 hours of participant time is required. To help you get started with the 10-12 hours of training, we conduct these one-hour orientations. Please register for this Flex# , located under **District** when selecting Flex Obligations & Workshops on the Faculty Web Services webpage, or make your reservation by contacting Katie Palacios ([kpalacio@sdccd.edu](mailto:kpalacio@sdccd.edu)). Please let us know in advance if your plans change, since the orientation includes a personalized course shell and login account. The orientation will show you how to login to the training course and begin Module 1. This Blackboard Vista Training Course introduces you to the course tools available to you as a course instructor and designer in the Blackboard Vista course management system. This training course is conducted online, so you will experience what it's like to be an online student. The course modules take you through different aspects of the software, and by the end of the course you will have a foundation of information that you can use to build your own online course.
